

PROCEDURE FOR UPDATING THE AC CHARGER VIA ACCESS POINT

- 1) Switch on the device and wait approximately 30 seconds until the SN appears in the list of available Wi-Fi networks. Select the corresponding network.
- 2) As the Wi-Fi password, enter the code shown on the device label; alternatively, try admin123.
- 3) Open a browser and type 192.168.4.1; if this is not accessible, try <https://apmode.net/>
- 4) Enter the password shown on the label or admin123

Alternatively, you can generate the password as follows:

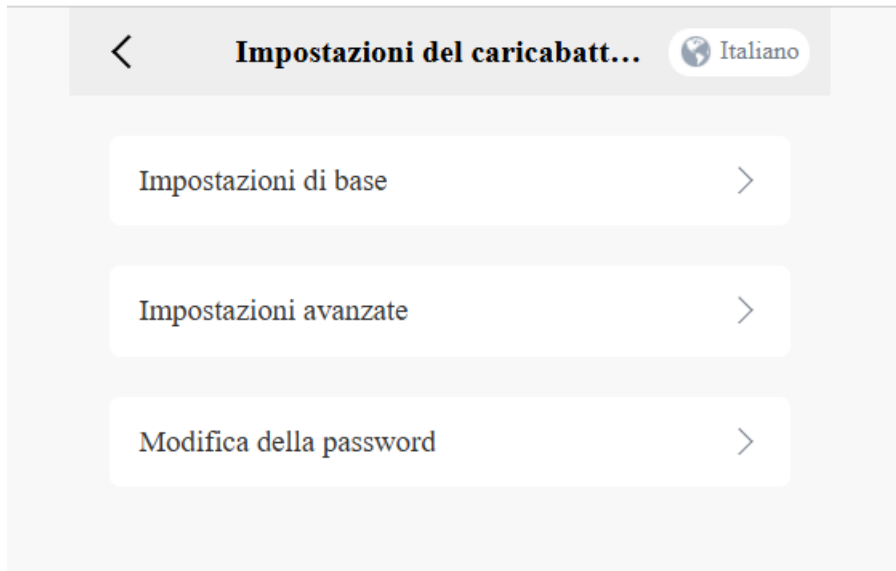

1. enter the SN in the tool
<https://crccalc.com/?crc=SN100123145982734&method=CRC-16/MODBUS&datatype=ascii&outtype=hex>
2. select CRC-16 (Modbus)
3. use the last 4 digits of the generated CRC code as the password

5) Select "charger settings"

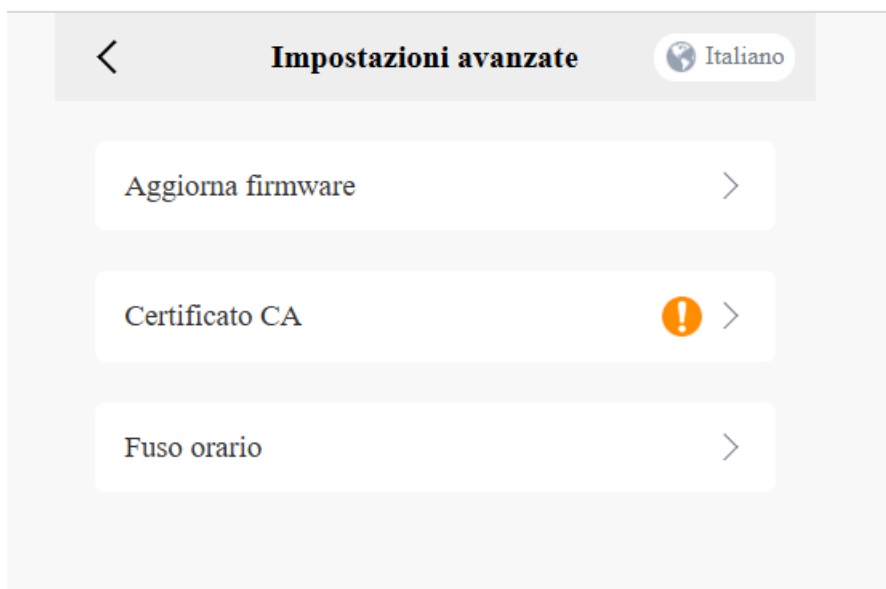

The screenshot shows a web interface with a grey header containing "Home" and a language selector for "Italiano". The main content area is white and contains several status cards: Gateway (SN20252508260001-V43.0.301), Caricabatterie (SN20252508260001-0.8.2.024), Nome Wi-Fi (Wifi ZCS Azzurro), Potenza del segnale (Eccellente), Metodo di comunicazione (WiFi), Stato del server (Collegato), and Stato di rete (Online). At the bottom, there are three blue buttons: "Impostazioni di rete", "Impostazioni del caricabatterie", and "Cancellare i dati".

6) Select "advanced settings"

7) Select "update firmware"

- 8) Select the .enfs file, then select update and wait for programming to complete (approximately 5 minutes)
